

How to Load Libraries on Korg Kronos

1. Make sure your Kronos runs OS 3.0.2 or later and your USB flash drive is formatted into Fat 32.
2. Use your PC / Laptop to unzip the downloaded file in a new folder.
3. Un-zip the downloaded files.
4. Copy all unzipped content to your USB storage device.
5. Be sure to include PCG file (KGE, KSC, UserBank KSC – if included), and the folder inside one main folder.
6. Safetely disconnect the USB storage device from your computer.
7. Connect the USB storage device to your KRONOS.
8. Press DISK button to enter Disk mode.
9. Go to the Disk Utility page.
10. Using the Drive select menu at the bottom of the page, select the USB storage device. You may need to wait a few seconds after connecting the device before it is recognized.
11. Copy the folder to your HDD. (see operation guide)
12. Check the pasted folder and press OPEN.
13. Check the file with PCG extension and press LOAD.

Follow these instructions for libraries with KSC, KGE

14. Make sure to check both KGE and KSC.
15. Use the “Append” loading type and “KSC Settings” as option. In order to have samples automatically loaded on each reboot, you have to add the file with KSC extension by pressing GLOBAL and “KSC Auto-Load” menu (see operation guide).

Terms of Use

Please note that all pre-existing bank data used by any library will be overwritten. You must have free user locations. For this reason we suggest that you make a backup to avoid any loss of data. We are free of any liability for any potential loss of user data or any keyboard malfunction. The use of purchased libraries by Synthcloud is granted for studio recordings and live performances.
